

LANKA LEGAL PARTNERS

Company Profile

AI Agent Knowledge Base — Reference Document · Version 2026.2 · Fictional / Demo Entity

1. Firm Overview

Lanka Legal Partners is a fictional, full-service law firm created as a demonstration entity for AI agent development and testing. The firm is modelled as a large Sri Lankan legal practice with 215 lawyers operating from a head office in Colombo and eight branch offices across the island. Every lawyer profile carries a synthetic 5.0 ★ client rating, an online and an in-person availability window, and a fixed 30-minute first-session format, so the dataset can drive an end-to-end AI consultation-booking agent.

All lawyer names, qualifications, contact details, and case references in this profile and its companion workbook are synthetic and do not represent real individuals, real law firms, or real legal matters. This material is intended solely for building, testing, and demonstrating AI agent workflows (client intake, lawyer matching, appointment scheduling, case status updates, etc.) and must not be used to imply an actual legal practice or to provide real legal advice.

2. Firm Details

Firm Name: Lanka Legal Partners (Pvt) Ltd — Attorneys-at-Law

Business Type: Full-Service Law Firm

Industry: Legal Services

Country: Sri Lanka

Head Office: Colombo, Sri Lanka

Branch Offices: Colombo (HQ), Kandy, Galle, Jaffna, Kurunegala, Negombo, Matara, Anuradhapura, Batticaloa

Total Lawyers: 215, ranging from Legal Trainee to Senior Partner

Client Rating: 5.0 ★ (5 out of 5) for every lawyer — synthetic demo rating

Consultation Format: 30-minute first session, online video or in-person by branch office

Practice Areas: 16 areas including Corporate & Commercial, Litigation, Criminal, Family, Property & Land, Labour & Employment, IP, Banking & Finance, Tax, Maritime & Shipping, Immigration, Constitutional & Human Rights, Environmental, Insurance, Arbitration & ADR, Construction

Courts Covered: Supreme Court, Court of Appeal, Commercial High Court, Provincial High Courts, District Courts, Magistrate's Courts, and Labour Tribunals across firm locations

3. Short Firm Description

Lanka Legal Partners is a demonstration Sri Lankan law firm offering corporate, litigation, and personal legal services through a nationwide network of Attorneys-at-Law. The firm uses AI agents to manage client inquiries, match clients to the right lawyer by practice area and court, schedule consultations, and provide case-status updates — all built on the synthetic lawyer directory described in this profile.

4. Vision

To be a reference model for how a nationwide Sri Lankan law firm can structure lawyer, practice-area, and court data for reliable AI-assisted client service.

5. Mission

To provide a realistic, well-structured synthetic dataset — firm information, lawyer profiles, seniority structure, qualifications, and court coverage — that developers can use to build and test AI legal-service agents without touching real client or lawyer data.

6. Core Values

- Client Focus — Matching clients to the lawyer best placed to handle their matter.
- Professional Integrity — Reflecting the qualification and admission standards of the Sri Lankan legal profession.
- Accessibility — Nationwide coverage across major courts and provinces.
- Confidentiality — Modelling firm data in a way that respects client privilege.
- Innovation — Applying AI responsibly to legal service delivery.

7. Firm Structure & Seniority Levels

Lawyers are organised into seven seniority tiers, from most to least senior:

Designation	Typical Years of Experience	Approx. Headcount
Senior Partner	18–30 years	11
Partner	12–20 years	28
Associate Partner	9–14 years	23
Senior Associate	6–10 years	34
Associate	3–7 years	62
Junior Associate	1–3 years	34
Legal Trainee	0–1 year	23

Full item-level lawyer data — name, designation, client rating, practice area(s), court(s) of practice, branch office, qualifications, bar admission year, years of experience, languages, online and in-person availability, consultation fee, and contact details for all 215 lawyers — is held in the companion workbook [Lanka_Legal_Partners_Lawyer_Directory.xlsx](#).

8. Practice Areas

Lawyers hold one or two areas of expertise drawn from:

Practice Area	Practice Area	Practice Area
Corporate & Commercial Law	Civil Litigation	Criminal Law
Family Law	Property & Land Law	Labour & Employment Law
Intellectual Property Law	Banking & Finance Law	Tax Law
Maritime & Shipping Law	Immigration Law	Constitutional & Human Rights Law
Environmental Law	Insurance Law	Arbitration & ADR
Construction Law		

9. Courts of Practice

The directory records each lawyer's court(s) of appearance, drawn from:

- Supreme Court of Sri Lanka · Court of Appeal · Civil Appellate High Court
- Commercial High Court – Colombo
- High Courts – Colombo, Kandy, Galle, Jaffna
- District Courts – Colombo, Kandy, Galle, Jaffna, Kurunegala
- Magistrate's Courts – Colombo, Negombo, Matara
- Labour Tribunal – Colombo

10. Qualifications Framework

Every lawyer holds, at minimum, an LLB (Hons) from a recognised Sri Lankan university and has been admitted as an Attorney-at-Law of the Supreme Court of Sri Lanka via the Sri Lanka Law College. More senior lawyers additionally hold one or more of:

- LLM from an overseas or local university (e.g. University of London, Cambridge, LSE, Colombo)
- Barrister-at-Law from an English Inn of Court (Lincoln's Inn, Middle Temple, Gray's Inn, Inner Temple)
- PhD in Law (Senior Partner tier only)
- Diploma in International Trade Law (selected lawyers)

11. Client Ratings, Availability & Consultation Booking

To support a bookable-consultation AI agent, every lawyer record carries a standard rating, a two-part weekly availability pattern, and a fixed first-session format:

11.1 Client Rating

Every lawyer carries a synthetic rating of 5.0 ★ (5 out of 5) in this demo dataset. In a production system this field would be computed from real client feedback rather than fixed.

11.2 Weekly Availability Pattern

Each lawyer has two recurring weekly slots:

Slot Type	Example	Format
Online	Monday, Friday, Saturday · 5:00 PM – 8:00 PM	Video consultation
In-Person	Tuesday, Wednesday · 4:00 PM – 6:00 PM	At the lawyer's branch office

Exact days and time windows vary by lawyer and are recorded in the Online Availability and In-Person Availability columns of the companion workbook.

11.3 First Session & Booking

- First session length: 30 minutes, for all lawyers and all matter types.
- Clients select a lawyer, then an available online or in-person slot from that lawyer's weekly pattern.
- A consultation fee (see the Consultation Fee (LKR) column, scaled by seniority) is shown before booking.
- Advance payment is required to confirm the scheduled slot — the AI Scheduling Agent should collect payment before it finalises a booking, not after.
- Rescheduling or cancellation policies are handled by the same agent and are not modelled as separate data fields in this version.

12. AI Agent Integration

Lanka Legal Partners integrates AI agents to enhance client service and internal efficiency.

12.1 Client Intake & Lawyer-Matching Agent

Functionality: A 24/7 assistant on the website and WhatsApp that gathers a prospective client's matter type, urgency, and preferred location, then matches them to a suitable lawyer using practice area, court of practice, seniority, and branch office from the lawyer directory. Escalates conflicts-of-interest checks and complex matters to a human partner.

Benefits: Faster first response, better-matched referrals, and reduced administrative screening time for partners.

12.2 Appointment Scheduling Agent

Functionality: Manages consultation bookings across all branch offices. It reads each lawyer's online and in-person weekly availability, offers open slots within the fixed 30-minute first-session format, collects the consultation fee payment to confirm the booking, sends reminders, and handles rescheduling.

Benefits: Reduces missed appointments, enforces payment-before-confirmation, and balances caseload across the firm's seniority tiers.

12.3 Case Status & Client Update Agent

Functionality: Provides existing clients with case-stage updates, next hearing dates, and document checklists, escalating substantive legal questions to the assigned lawyer.

Benefits: Keeps clients informed without adding to fee-earners' administrative workload.

13. Why This Dataset

This profile and its companion workbook give an AI agent everything it needs to answer questions such as "which lawyer handles land disputes in Kandy" or "who is available for an online consultation on Friday evening" using structured, queryable fields rather than free text — while remaining entirely fictional and safe for development, demos, and testing.

14. Data Files

File	Contents
Lanka_Legal_Partners_Lawyer_Directory.xlsx	215 lawyer records: name, designation, client rating, practice area(s), court(s), branch, qualifications, bar admission year, years of experience, languages, online/in-person availability, first-session duration, consultation fee, booking requirement, email, phone
